

I think that xm radio is doing a fine job. I'm a truck driver i run all 48 states and canda the up to date wheather and local traffic information is one of the best things truck drivers can have on the radio. much less all other information that they put out to us. i would hate to loss all the information that they put out to the drivers out their. So please do somethink for truck drivers this time and keep it on the air.

Thanks
